

# Black Beauty™ SolarGreen

## Heat-Tolerant Texas Bluegrass

Black Beauty SolarGreen Mixture is very heat and drought tolerant and contains Texas Bluegrass with Black Beauty Turf-type Tall Fescues. This mixture is perfect for sunny and/or shady areas. SolarGreen Texas Bluegrass can withstand very hot temperatures, up to 100° F and requires less maintenance than traditional Kentucky Bluegrass. This mixture will produce a dark-green, heat resistant, highly durable lawn.

Black Beauty SolarGreen Mixture can grow roots up to four feet deep, contains a waxy leaf coating to preserve moisture, displays a uniform (not clumpy) growth habit and naturally withstands insects and diseases.

- Contains Texas Bluegrass that withstands heat up to 100°F
- Grows well in sun or shade
- Germinates in 14 to 21 days
- Mixed with Black Beauty for the ultimate heat/drought resistance
